

Declaration by the exporter of honey bees from Australia to Canada regarding transportation

Exporter's details

Importer's details

Date of consignment leaving Australia

- 1) Food supplied to the honey bees for consumption during transit-
 - a. Does not contain honey*
 - OR
 - b. Contains honey that has been irradiated at _____gys*.

*Delete that which is not applicable

- 2) Transportation of the honey bees from Australia (Sydney, Melbourne or Brisbane or Perth) is either
 - a. Directly to Canada*
 - OR
 - b. Via the following approved route:
 - Hawaii, USA (no change in airplane will occur)
 - San Francisco or Los Angeles, USA;
 - Seoul, Korea;
 - Singapore
 - Hong Kong
 - London, United Kingdom*
 - OR
 - c. An alternative route approved in writing by CFIA and attached to this declaration*

*Delete those that are not applicable

- 3) Transit will be in a manner that (i) precludes the outside storage of the bees in transit; (ii) the shipment remains in a secure area on the airport premises, inaccessible to bees or bee pests (such as small hive beetle, where applicable), and is kept separate from any other animals and animal products; and (iii) includes verification by a representative of the exporter or importer that the outer covering of each shipment is free of hitch-hiker bees or bee pests, prior to departure for Canada.

- 4) Transportation of the honey bees is in accordance with the International Air Transport Association (IATA) Live Animal Regulations, approved by the Office International des Epizooties (OIE). For all forms of transport, suitable arrangements have been made for the feeding, watering and care of the honey bees during transportation, as far as can be determined.
