If a manual description is supplied, this will override the <i>Product Category</i> description. The <i>Manual product description</i> field is found in <i>Tab 1 – Product &gt; Additional details</i>	The <i>Process end date</i> is mandatory and will appear here. This information is populated in <i>Tab 1 - Product - Production Processes</i>	This information is populated in <i>Tab 1 – Product &gt; Outer packaging &gt; Quantity</i>	This information is populated in <i>Tab 1 – Product &gt; Net metric weight amount</i>

The product/s described above:

- (a) comes from an establishment(s) implementing a Hazard Analysis and Critical Control Point (HACCP) Program.
- (b) have been handled, prepared, packaged and stored in a hygienic manner.
- (c) is/are fit for human consumption.

The NEXDOC system will automatically generate the required product endorsement. This occurs in *Tab - 6 Endorsements*

Honey and bee products shall comply with maximum residue limits for residues of pesticides and veterinary drugs for honey established by Codex Alimentarius Commission or, in the absence of a Codex MRL, conforms to the Australia New Zealand Food Standards Code.

The honey either:

- (a) comes from apiaries situated in a country or zone free from *Aethina tumida*; the free zone is an area of at least 100km radius, which is not subject to any restrictions associated with the occurrence of the small hive beetle (*A. tumida*); or
- (b) has been strained through a filter with a pore size of between 0.2mm and 0.42mm to ensure the destruction of *A. tumida*; or
- (c) has been frozen at a core temperature of minus 12 degrees Celcius or less for at least 24 hours. The honey comes from apiaries which are supervised and controlled by the relevant government authority and all precautions have been taken to prevent contamination with *A. tumida*.

The honey comes from apiaries which are supervised and controlled by the relevant government authority and all precautions have been taken to prevent contamination with *A. tumida*.
