| EXPORT ADVISORY NOTICE 2015 - 09 | | 29 JUNE 2015 |
| Title: | Russian Federation – Extension of suspension of trade in Australian agricultural commodities | |
| Species: | All species and reproductive material | |
| Country: | Russia | |
| Relevant to: | <ol style="list-style-type: none">1. All exporters of live animals and reproductive material2. LiveCorp and ALEC3. Department of Agriculture Live Animal Exports Officers | |

Purpose

To advise exporters of the extension of the suspension of trade in Australian agricultural commodities including certain live animals to the Russian Federation (*original suspension advice - EAN 2014-13*).

Background

The department has become aware that the Prime Minister of Russia Dmitry Medvedev has signed an order extending the Russian food import ban for an additional year, to 5 August 2016 (inclusive).

The order imposes an extension of the ban on imports of specified agricultural commodities originating from countries including Australia.

An unofficial translation of the list of agricultural commodities affected by the order has been adjusted from the original ban and is provided, identified by CU TC VED Code, at Attachment 1.

Instructions

In considering whether to grant an export permit the Secretary may refuse to grant the export permit if there is reason to believe that the intended country of destination will not permit the consignment of live animals or reproductive material to enter.

The department will continue to carefully consider all applications for export permits for live animals or reproductive material destined to the Russian Federation.

The department advises all exporters to proceed with extreme caution when considering whether to apply to export live animals or reproductive material to the Russian Federation.

The department is not aware if the list of commodities affected by the ban will be expanded further. The department will provide all exporters with updates as further information becomes available.
